

ENISS Strategic Plan

13 February 2020

1. ENISS Ambition and Missions

ENISS Ambition

Bring together decision makers and specialists from the European license holders of nuclear installations with the Regulators in an effort to establish high level and practicable safety targets and safety rules, and to converge on a set of European Nuclear Installations Safety Standards and their harmonised implementation.

ENISS Missions:

- Develop common views and positions on the evolutions of the nuclear safety standards.
- Interact appropriately with the regulators and the key stakeholders to ensure that the licensees' positions, through ENISS, are effectively given due consideration.
- Maintain an efficient information exchange platform between ENISS members with respect to nuclear safety matters.

ENISS covers the following technical scope: nuclear safety and associated regulations during the whole lifecycle of nuclear installations, including radiation protection and security, for long term operation, new build, waste management and decommissioning.

2. ENISS Strategic Objectives

For each mission strategic objectives are defined:

Mission 1 – Develop common views and positions on the evolutions of the nuclear safety standards

SO1.1. Address priority safety issues, with regards to regulations and standards, as pro-actively as possible.

SO1.2. Encourage stability, practicability and efficiency in the nuclear safety regulations.

SO1.3. Publish ENISS common positions (position papers, statements).

Mission 2 – Interact appropriately with the regulators and the key stakeholders to ensure that the licensees' positions, through ENISS, are effectively given due consideration

The key stakeholders are WENRA, IAEA, the European Commission, ENSREG, NEA and ICRP.

SO2.1. Respond to key stakeholders' consultations on international safety standards, reports, recommendations, directives... – provide comments and express licensees' views.

SO2.2. Increase ENISS recognition and presence in the nuclear safety regulation field, by enhancing its influence through pro-active external communication about ENISS positions and activities.

SO2.3. Interact appropriately with industry organisations to support ENISS ambition (EUR, WNA/CORDEL, WANO, ISO, NEI...).

SO2.4. Interact appropriately with TSOs on selected subjects.

Mission 3 – Maintain an efficient information exchange platform between ENISS members with respect to nuclear safety matters

SO3.1. Improve the readiness to carry out the ENISS activities, and their efficiency.

SO3.2. Exchange of information on the interaction of licensees with their national regulators, in order to achieve a harmonised implementation of regulations.
